

ANNA KWAS

CYBERSECURITY ANALYST · SOC PATHWAY

amkwas2020@gmail.com | +(502) 4783-2193 | [linkedin.com/in/annakwas](https://www.linkedin.com/in/annakwas) | [a-code1819.github.io/AnnasCV](https://github.com/a-code1819/AnnasCV)

SUMMARY

Entry-level Cybersecurity Analyst with hands-on experience in SIEM monitoring, Linux systems, and vulnerability analysis through home lab simulations and Google Cybersecurity training. Proven ability to analyze logs, identify risks, and document incidents. Background in high-volume technical support resolving 40+ cases daily while maintaining strict data security. Seeking a SOC Analyst role to contribute to real-time threat detection and incident response.

TECHNICAL SKILLS

Cybersecurity: SIEM & Log Analysis · IDS / Threat Detection · Vulnerability Management · Incident Response · IAM

Systems & Tools: Linux · Windows · SQL · Python · Git · Wireshark · VirtualBox · Nmap · OpenVAS

Web: HTML · CSS · JavaScript

EXPERIENCE

Customer Representative | *Everise — American Airlines Account* · Nov 2025 – Jul 2026

- ▶ Provided high-volume support for reservations, flight changes, cancellations, and baggage inquiries — 40+ cases daily.
- ▶ Resolved complex issues while adhering to American Airlines policies; maintained strict data security and confidentiality.
- ▶ Utilized internal CRM systems to document cases, process requests, and maintain accurate customer records.

AI Instructor | *Christian American School (CAS)* · Aug 2025 – Oct 2025

- ▶ Taught middle and high school students foundational AI concepts, responsible usage, and ethical considerations.
- ▶ Guided students through practical projects; promoted critical thinking in applied technology contexts.

Technical Support Specialist | *Teleperformance — COX Communications Account* · Nov 2023 – Dec 2023

- ▶ Diagnosed and resolved network connectivity and device configuration issues for 40+ customers daily.
- ▶ Maintained secure handling of sensitive customer data; reduced repeat issues via root-cause analysis.

CYBER PROJECTS

◆ Home Lab Security Testing (Kali Linux / VirtualBox)

- ▶ Simulated brute-force attacks; analyzed authentication logs and network traffic with Wireshark to identify attack patterns.
- ▶ Practiced log analysis using sample SIEM dashboards; produced incident response reports.

◆ Vulnerability Scanning Project (OpenVAS / Nmap)

- ▶ Identified open ports and misconfigurations; analyzed CVSS scores, categorized risks, and created remediation plans.

◆ Python Network Scanner

- ▶ Built a multi-threaded scanner detecting active hosts and exposed ports — 40% faster scanning via threading.

◆ SOC Incident Response Simulation (Case Study)

- ▶ Detected brute-force attack pattern from foreign IPs; simulated SIEM alert triage, escalation, and MFA remediation.

EDUCATION & CERTIFICATIONS

Google Cybersecurity Professional Certificate — Google (Aug 2024)

8-course program: SIEM tools, Linux, SQL, Python, IDS, risk analysis, threat detection, and incident response.

Google AI Essentials — Google (Jul 2024)

Practical AI applications, prompt engineering, and best practices.

CompTIA Security+ (Course Completion) — Alison (Aug 2023)

Risk management, cryptography, IAM, and network security.

Junior Web Development Program — Delgado Community College (Dec 2021)

TESOL Certificate — International Open Academy (May 2020)

High School Diploma — 12 Stone Academy, Miami, FL (Dec 2020)
