

ANNA KWAS

CYBERSECURITY ANALYST | SOC ANALYST

amkwas2020@gmail.com • +(502) 4783-2193 • linkedin.com/in/annakwas
a-code1819.github.io/AnnasCV • github.com/a-code1819

PROFILE

Entry-level Cybersecurity Analyst focused on SOC operations, with hands-on practice in SIEM/log analysis, Linux, vulnerability assessment, network traffic analysis, and incident response through home-lab simulations and Google Cybersecurity training. Experienced in high-volume technical support, resolving 40+ cases daily while protecting sensitive customer data. Seeking a SOC Analyst role supporting real-time threat detection and response.

TECHNICAL SKILLS

Cybersecurity	SIEM & Log Analysis • IDS / Threat Detection • Vulnerability Management • Incident Response • IAM
Systems & Security Tools	Linux • Windows • Wireshark • Nmap • OpenVAS • VirtualBox • Git
Programming & Web	Python • SQL • HTML • CSS • JavaScript

PROFESSIONAL EXPERIENCE

Customer Representative

Nov 2025 – Jul 2026

Everise — American Airlines Account

- Handled 40+ daily customer cases involving reservations, flight changes, cancellations, and baggage inquiries in a high-volume environment.
- Resolved complex issues while following account policies and maintaining strict data security and confidentiality.
- Documented cases and requests in internal CRM systems, maintaining accurate customer records.

AI Instructor

Aug 2025 – Oct 2025

Christian American School (CAS)

- Taught middle and high school students foundational AI concepts, responsible use, and ethical considerations.
- Led practical projects that strengthened critical thinking and applied technology skills.

Technical Support Specialist

Nov 2023 – Dec 2023

Teleperformance — COX Communications Account

- Diagnosed and resolved network connectivity and device-configuration issues for 40+ customers daily.
- Protected sensitive customer information and applied root-cause analysis to reduce repeat issues.

CYBERSECURITY PROJECTS

◆ Home Lab Security Testing (Kali Linux / VirtualBox)

- Simulated brute-force attacks; analyzed authentication logs and network traffic with Wireshark; practiced SIEM dashboard analysis and produced incident-response reports.

◆ Vulnerability Scanning Project (OpenVAS / Nmap)

- Identified open ports and misconfigurations, evaluated CVSS scores, categorized risks, and created remediation plans.

◆ Python Network Scanner (Python)

- Built a multi-threaded scanner to detect active hosts and exposed ports, achieving 40% faster scanning through threading.

◆ SOC Incident Response Simulation (Case Study)

- Detected a brute-force pattern from foreign IPs and simulated SIEM alert triage, escalation, and MFA remediation.

EDUCATION & CERTIFICATIONS

Google Cybersecurity Professional Certificate

Google | Aug 2024

SIEM tools, Linux, SQL, Python, IDS, risk analysis, threat detection, and incident response.

Google AI Essentials

Google | Jul 2024

Practical AI applications, prompt engineering, and best practices.

CompTIA Security+ (Course Completion)

Alison | Aug 2023

Risk management, cryptography, IAM, and network security.

Junior Web Development Program

Delgado Community College | Dec 2021

TESOL Certificate

International Open Academy | May 2020

High School Diploma

12 Stone Academy, Miami, FL | Dec 2020
