SUMMARY

Entry-level Cybersecurity Analyst with hands-on experience in SIEM monitoring, Linux systems, and vulnerability analysis through home lab simulations and Google Cybersecurity training. Proven ability to analyze logs, identify risks, and document incidents. Background in high-volume technical support resolving 40+ cases daily while maintaining strict data security. Seeking a SOC Analyst role to contribute to real-time threat detection and incident response.

TECHNICAL SKILLS

Cybersecurity

- SIEM Monitoring & Log Analysis
- IDS / Threat Detection
- Vulnerability Management
- Incident Response (basic)
- IAM

Systems & Tools

- Linux • Windows • SQL • Python • Git
- Wireshark • VirtualBox • Nmap

Web

- HTML • CSS • JavaScript

CYBER PROJECTS

Home Lab Security Testing

- Built a virtual lab using VirtualBox with Kali Linux.
- Simulated brute-force attacks and analyzed authentication logs to identify attack patterns.
- Used Wireshark to inspect network traffic and identify suspicious activity.
- Documented findings and created incident response reports.
- Practiced log analysis using sample SIEM dashboards.

Vulnerability Scanning Project

- Conducted vulnerability scans using OpenVAS/Nmap.
- Identified open ports and misconfigurations.
- Analyzed CVSS scores and categorized risk levels.
- Created remediation recommendations.

EXPERIENCE

AI Instructor – Christian American School (CAS)
August 2025 – October 2025

- Taught middle and high school students foundational AI concepts and responsible usage.
- Explained algorithms and guided students through practical projects.
- Promoted critical thinking and ethical considerations in technology use.

Technical Support Specialist – Teleperformance – COX
Communications Account
November 2023 – December 2023

- Diagnosed and resolved network connectivity and device configuration issues.
- Guided customers through structured troubleshooting processes.
- Maintained secure handling of sensitive customer information.
- Reduced repeat issues through effective root-cause analysis.

EDUCATION

- Google Cybersecurity Professional Certificate · August 2024
 - Completed 8-course program covering SIEM tools, Linux, SQL, Python, and IDS.
 - Gained hands-on experience in risk analysis, threat detection, and incident response.
- Google AI Essentials · July 2024
 - Learned practical applications of AI for productivity and decision-making.
 - Developed prompt engineering and AI usage best practices.
- CompTIA Security+ (Course Completion) | Alison · August 2023
 - Covered core cybersecurity topics: risk management, cryptography, IAM, and network security.
- Junior Web Development Program | Delgado Community College · December 2021
- TESOL Certificate | International Open Academy · May 2020
- High School Diploma | 12 Stone Academy, Miami, FL · December 2020
